

Public Letter of Support

I am pleased to share my support for the ideas submitted by Bingham Labs for public discussion. My donations will allow their team to begin public engagement of these ideas and find the most acceptable path for the public interest. Advances in transportation, water systems, electricity, AI data centers, and carbon-capture technology are essential to America's long-term growth and to meeting basic human needs. I want to support a Smart Colorado with these systems that deserve thoughtful evaluation and community engagement.

As of _____, 2026, I formally endorse Bingham Labs' work. Once some evaluation is complete, I may consider additional involvement depending on the study's findings.
